

## Product Safety Sheet

The document drafted on a voluntary basis is not required under Article 31 of Regulation (EC) No 1907/2006 and subsequent amendments

Version number 2

Revision: 16.01.2026

### SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1 Product identifier

|                     |                                                                     |
|---------------------|---------------------------------------------------------------------|
| Trade name:         | <b>EUROPRENE K SOL; AGON K SOL</b>                                  |
| Registration number | Not applicable                                                      |
| Chemical name       | Styrene-Butadiene copolymer polymerized in solution (S-SBR)         |
| Synonyms            | EUROPRENE K SOL R 72613, R 72616, B 1205, B 183;<br>AGON K SOL C283 |

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

|                                            |                                                  |
|--------------------------------------------|--------------------------------------------------|
| Application of the substance / the mixture | Production of various rubber final applications. |
| Uses advised against                       | Not determined.                                  |

#### 1.3 Details of the supplier of the safety data sheet

|                                                                 |                                                                                                                              |
|-----------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------|
| Manufacturer/Supplier                                           | LOTTE VERSALIS ELASTOMERS Co., Ltd.<br>51, Lotte Tower, Boramae-ro 5-gil, Dongjak-gu, 07071, Korea<br>Phone: +82 61 690 2510 |
| E-mail address of the competent person responsible for the SDS: | SDS.LVE@lvelastomers.com                                                                                                     |

#### 1.4 Emergency telephone number

+82 61 690 2510

### SECTION 2: Hazards identification

#### 2.1 Classification of the substance or mixture

|                                                          |                                                                                |
|----------------------------------------------------------|--------------------------------------------------------------------------------|
| Classification according to Regulation (EC) No 1272/2008 | Based on the requirements of the CLP Regulation, the product is not classified |
|----------------------------------------------------------|--------------------------------------------------------------------------------|

#### 2.2 Label elements

|                                                     |                |
|-----------------------------------------------------|----------------|
| Labelling according to Regulation (EC) No 1272/2008 | Not applicable |
| Hazard pictograms                                   | Not applicable |
| Signal word                                         | Not applicable |
| Hazard statements                                   | Not applicable |

#### 2.3 Other hazards

|                                                  |                                                                                                                             |
|--------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| Results of PBT and vPvB assessment<br>PBT:       | This substance / mixture is not a PBT applying the criteria of REACH Regulation, Annex XIII.                                |
| vPvB:                                            | This substance / mixture is not a vPvB applying the criteria of REACH Regulation, Annex XIII.                               |
| Determination of endocrine-disrupting properties | The mixture does not contain one or more substances with endocrine-disrupting properties at a concentration of 0.1% or more |

### 3. Composition/information on ingredients

#### 3.2 Mixture

|              |                                                                                                                |
|--------------|----------------------------------------------------------------------------------------------------------------|
| Description: | Mixture, composed of a copolymer and of substances below the applicable classification limits or not hazardous |
|--------------|----------------------------------------------------------------------------------------------------------------|

| Chemical Name               | Cas No.   | Contents |
|-----------------------------|-----------|----------|
| Styrene-butadiene copolymer | 9003-55-8 | 100%     |

|                      |                |
|----------------------|----------------|
| Dangerous components | Not applicable |
|----------------------|----------------|

## Product Safety Sheet

The document drafted on a voluntary basis is not required under Article 31 of Regulation (EC) No 1907/2006 and subsequent amendments

Version number 2

Revision: 16.01.2026

### 4. First aid measures

#### 4.1 Description of first aid measures

General information:

No special measures required.

After inhalation:

Dust or gas/vapours released by heat: move the affected person away from the contaminated area into fresh air; seek medical assistance.

After skin contact:

In case of contact with melted material, cool down with cold water and seek medical assistance. Do not remove the product that solidified on skin.

After eye contact:

Treat as a burn.

After swallowing:

Rinse opened eye for several minutes under running water.

Not applicable.

#### 4.2 Most important symptoms and effects, both acute and delayed

Dust or gas/vapours released by heat may cause respiratory irritation and eye reddening.

#### 4.3 Indication of any immediate medical attention and special treatment needed

Treat symptomatically.

### 5. Firefighting measures

#### 5.1 Extinguishing media

Suitable extinguishing agents:

Water, water spray, foam, dry chemicals, carbon dioxide.

For safety reasons unsuitable extinguishing agents:

Not applicable

#### 5.2 Special hazards arising from the substance or mixture

During combustion, carbon dioxide, carbon monoxide (in oxygen-deficient conditions), and incompletely burned hydrocarbons may be generated.

Overheating/pyrolysis may evolve vapours made up of monomers, low molecular weight polymers and their oxidation products.

#### 5.3 Advice for firefighters

Protective equipment

Wear suitable protective clothing (helmet, goggles, fire resistant gloves, boots) and protect respiratory organs (self-contained breathing apparatus).

Additional information

Cool endangered receptacles with water spray.

### 6. Accidental release measures

#### 6.1 Personal precautions, protect equipment and emergency procedures

For non-emergency

No special measures are required under normal conditions; ensure adequate ventilation of the spillage area.

For emergency

Do not attempt to take action without suitable protective equipment. For further information refer to section 8

#### 6.2 Environmental precautions

Not special measures required; however, avoid release to the environment.

#### 6.3 Methods and material for containment and cleaning up

Collect mechanically. Reuse if possible or dispose of as required by national and local regulations.

#### 6.4 Reference to other sections

For further information refer to section 13

## Product Safety Sheet

The document drafted on a voluntary basis is not required under Article 31 of Regulation (EC) No 1907/2006 and subsequent amendments

Version number 2

Revision: 16.01.2026

## 7. Handling and storage

### 7.1 Precautions for safe handling

Precautions for safe handling

During the processing of the product, avoid inhalation of fumes or powders, by providing good ventilation of the workroom and, if necessary, by a suitable exhaust system. If required, wear appropriate personal protect equipment.

Information about fire - and explosion protection:

The product is a poor conductor and it is likely to accumulate Electrostatic charges. Precautions normally used for not conductive materials and against the accumulation of electrostatic charges should be used during processes which employ powdered materials or produce dust (e.g.: reduce speed to the minimum, install earthing systems, the absolute prohibition to smoke and use free flames, use inert gases in mills and in the closed systems).

Hygiene measures

Do not eat, drink or smoke when using this product. Always wash hands after handling the product

### 7.2 Conditions for safe storage, including any incompatibilities

Storage conditions

Keep only in the original container in a cool, well-ventilated place away from: Heat sources.

Keep out of direct sunlight.

### 7.3 Specific end use(s)

No further relevant information available.

## 8. Exposure controls/personal protection

### 8.1 Control parameters

Ingredient with limit values that require monitoring at the work place

The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.

### 8.2 Exposure controls

Appropriate engineering controls

No further data; see section 7.

General protective and hygienic measures

Traces of monomers and other volatile substances may be given off during processing, particularly at unusually high processing temperatures. Work rooms must be provided with adequate ventilation and exhaust equipment to collect dust and gas/vapours that may be evolved during the conversion.

Suitable technical controls

Ensure good ventilation / exhaustion at the workplace.

Personal protection measures

The personal protective equipment will vary according to the possible exposure and danger of working conditions.

Respiratory protection

In normal conditions masks with dust filters should be available for use when requested.

Protection of skin

- Hand protection

Protective gloves.

- Eye/face protection

In case of dust production: protective goggles.

- Other:

Standard work clothes.

- Thermal dangers

No information available.

- Environmental exposure controls

No information available.

## 9. Physical and chemical properties

### 9.1 Information on basic physical and chemical properties

Physical state

Solid

Form

Bales

Colour

Clear

Odour

Light

## Product Safety Sheet

The document drafted on a voluntary basis is not required under Article 31 of Regulation (EC) No 1907/2006 and subsequent amendments

Revision: 16.01.2026

|                                                          |                        |
|----------------------------------------------------------|------------------------|
| Odour threshold                                          | Not determined.        |
| Melting point/freezing point                             | Undetermined.          |
| Boiling point or initial boiling point and boiling range | Undetermined.          |
| Flammability                                             | Not determined.        |
| Lower explosion limit                                    | Not determined.        |
| Upper explosion limit                                    | Not determined.        |
| Flash point:                                             | Not applicable.        |
| Ignition temperature:                                    | >300 °C                |
| Decomposition temperature:                               | >200 °C                |
| pH                                                       | Not applicable.        |
| Viscosity (kinematic/dynamic)                            | Not applicable.        |
| Solubility                                               | Insoluble in water     |
| Partition coefficient n-octanol/water (log value)        | Not determined.        |
| Vapour pressure:                                         | Not applicable.        |
| Density at 20 °C:                                        | 0.93 g/cm <sup>3</sup> |
| Relative density                                         | Not determined.        |
| Vapour density                                           | Not applicable.        |
| Relative gas density                                     | Not applicable.        |
| Particle characteristics                                 | Not applicable.        |

## 9.2 Other information

### 9.2.1 Information with regard to physical hazard classes

Not applicable; Product does not present an explosion hazard.

### 9.2.2 Other safety characteristics

No additional information available

## 10. stability and reactivity

### 10.1 Reactivity

The product does not participate to dangerous reactions if stored and handled as prescribed/indicated.

### 10.2 Chemical stability

Thermal decomposition

Observe the recommended processing temperatures.  
The product is stable and inert in the recommended storage and handling conditions (see section 7).

### 10.3 Possibility of hazardous reactions

No dangerous reactions known under normal conditions of use.

### 10.4 Conditions to avoid

Exposure to sunlight and/or heat. Build-up of electrostatic charges.

### 10.5 Incompatible materials

Avoid the contact with oxidizing substances.

### 10.6 Hazardous decomposition products

Under normal conditions of storage and use, hazardous decomposition products should not be produced.

## 11. Toxicological information

### 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

|                                        |                                                                   |
|----------------------------------------|-------------------------------------------------------------------|
| Acute toxicity(oral/dermal/inhalation) | Based on available data, the classification criteria are not met. |
| Skin corrosion/irritation              | Based on available data, the classification criteria are not met. |
| Serious eye damage/irritation          | The product's dust may cause irritation of eyes.                  |
| Respiratory or skin sensitisation      | Based on available data, the classification criteria are not met. |
| Germ cell mutagenicity                 | Based on available data, the classification criteria are not met. |
| Carcinogenicity                        | Based on available data, the classification criteria are not met. |
| Reproductive toxicity                  | Based on available data, the classification criteria are not met. |

## Product Safety Sheet

The document drafted on a voluntary basis is not required under Article 31 of Regulation (EC) No 1907/2006 and subsequent amendments

Version number 2

Revision: 16.01.2026

|                                                                           |                                                                                                                                                                                                                                                                                                                                                  |
|---------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| STOT-single exposure                                                      | Based on available data, the classification criteria are not met.                                                                                                                                                                                                                                                                                |
| STOT-repeated exposure                                                    | Based on available data, the classification criteria are not met.                                                                                                                                                                                                                                                                                |
| Aspiration hazard                                                         | Based on available data, the classification criteria are not met.                                                                                                                                                                                                                                                                                |
| Additional toxicological information:                                     | The product does not present any intrinsic health hazard when processed according to correct working procedures.<br>Specific information on the product is not available in the literature.<br>Residual monomers may be present in the product at trace levels, hindered in the polymer matrix and therefore not available in normal conditions. |
| CMR effects (carcinogenicity, mutagenicity and toxicity for reproduction) | No evidence of these effects has been reported.                                                                                                                                                                                                                                                                                                  |

## 11.2 Information on other hazards

|                                        |                                                                                                                              |
|----------------------------------------|------------------------------------------------------------------------------------------------------------------------------|
| 11.2.1 Endocrine disrupting properties | The mixture does not contain one or more substances with endocrine-disrupting properties at a concentration of 0.1% or more. |
| 11.2.2 Other information               | Not determined.                                                                                                              |

## 12. Ecological information

|                                         |                                                                                                                                                                                            |
|-----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 12.1 Toxicity                           | The product is not considered harmful to aquatic organisms nor to cause long-term adverse effects in the environment.                                                                      |
| 12.2 Persistence and degradability      | The product is a non-biodegradable polymer.                                                                                                                                                |
| 12.3 Bioaccumulative potential          | Does not accumulate in organisms.                                                                                                                                                          |
| 12.4 Mobility in soil                   | No further relevant information available.                                                                                                                                                 |
| 12.5 Results of PBT and vPvB assessment |                                                                                                                                                                                            |
| PBT:                                    | This substance / mixture is not a PBT applying the criteria of REACH Regulation, Annex XIII.                                                                                               |
| vPvB:                                   | This substance / mixture is not a vPvB applying the criteria of REACH Regulation, Annex XIII.                                                                                              |
| 12.6 Endocrine disrupting properties    | This mixture contains no substances with endocrine disrupting properties as per REACH Article 59(1), Regulation (EU) 2017/2100, or Regulation (EU) 2018/605 at concentrations $\geq 0.1\%$ |
| 12.7 Other adverse effects              | No additional information available.                                                                                                                                                       |

## 13. Disposal considerations

### 13.1 Waste treatment methods

|                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|---------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Recommendation                  | The same safety considerations that apply to the product as it is, apply to scraps/waste as well.<br>Residues should be disposed of as required by national and local regulations. The incineration must be done under approved conditions, possibly with energy recovery and only at suitable facilities equipped with a scrubber for the treatment of fumes before their release into the atmosphere.<br>Landfilling should be avoided as far as possible. If unavoidable, use approved landfill sites. |
| Uncleaned packaging             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| - Recommendation:               | Disposal must be made according to official regulations.                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| - Recommended cleansing agents: | Not applicable.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

## Product Safety Sheet

The document drafted on a voluntary basis is not required under Article 31 of Regulation (EC) No 1907/2006 and subsequent amendments

Version number 2

Revision: 16.01.2026

### 14. Transport information

#### 14.1 UN number or ID number

ADR, IMDG, IATA, ADN, RID Not applicable

#### 14.2 Transport hazard class(es)

ADR, IMDG, IATA, ADN, RID Not applicable

#### 14.3 UN proper shipping name

ADR, IMDG, IATA, ADN, RID Not applicable

#### 14.4 Packing group

ADR, IMDG, IATA, ADN, RID Not applicable

#### 14.5 Environmental hazards

Marine pollutant No

#### 14.6 Special precautions for user

Overland transport Not applicable  
Transport by sea Not applicable  
Air transport Not applicable  
Inland waterway transport Not applicable  
Rail transport Not applicable

#### 14.7 Maritime transport in bulk according to IMO Instruments

Not applicable

### 15. Regulatory information

#### 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

##### 15.1.1 EU Regulations

REACH Annex XVII (Restriction List) None of the ingredients is listed.  
REACH Annex XIV (Authorisation List) None of the ingredients is listed.  
REACH Candidate List (SVHC) None of the ingredients is listed.  
PIC Regulation (Prior Informed Consent) None of the ingredients is listed.  
POP Regulation (Persistent Organic Pollutants) None of the ingredients is listed.  
2011/65/EU Annex II, amended 2015/863 (RoHS) None of the ingredients is listed.  
Ozone Regulation (1005/2009) None of the ingredients is listed.  
Explosives Precursors Regulation (2019/1148) None of the ingredients is listed.  
Drug Precursors Regulation (273/2004) None of the ingredients is listed.

##### 15.1.2 National regulations

Not applicable

#### 15.2 Chemical safety assessment

Assessment is not required.

### 16. Other information

Department issuing SDS Planning/IMS

Date of previous version 03.04.2024

Version number of previous version 1

Data compared to the previous version Altered.

Abbreviations and acronyms

ADN: European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways;  
ADR: European Agreement concerning the International Carriage of Dangerous Goods by Road;  
ATE: Acute Toxicity Estimate; BCF: Bioconcentration factor;  
BCF: Bioconcentration factor

## Product Safety Sheet

The document drafted on a voluntary basis is not required under Article 31 of Regulation (EC) No 1907/2006 and subsequent amendments

Version number 2

Revision: 16.01.2026

BLV: Biological limit value;  
BOD: Biochemical oxygen demand  
CAS-No.: Chemical Abstracts Service number;  
COD: Chemical oxygen demand;  
DMEL: Derived Minimal Effect Level;  
DNEL: Derived No-Effect Level;  
EC-No.: European Community number;  
ED: Endocrine disrupting properties;  
EN: European Standard;  
IARC: International Agency for Research on Cancer;  
IATA: International Air Transport Association;  
IMDG: International Maritime Dangerous Goods;  
LC50: Median lethal concentration;  
LD50: Median lethal dose;  
LOAEL: Lowest Observed Adverse Effect Level;  
NOAEC: No-Observed Adverse Effect Concentration;  
NOAEL: No-Observed Adverse Effect Level;  
NOEC: No-Observed Effect Concentration;  
N.O.S.: Not Otherwise Specified;  
OECD: Organisation for Economic Co-operation and Development;  
OEL: Occupational Exposure Limit;  
PBT: Persistent, Bioaccumulative and Toxic;  
PNEC: Predicted No-Effect Concentration;  
RID: Regulations concerning the International Carriage of Dangerous Goods by Rail;  
SDS: Safety Data Sheet;  
STP: Sewage treatment plant;  
ThOD: Theoretical oxygen demand;  
TLM: Median Tolerance Limit;  
VOC: Volatile Organic Compounds;  
vPvB: Very Persistent and Very Bioaccumulative;
